Project details

A map of the Somerset Levels and Moors Ramsar surface water catchment.

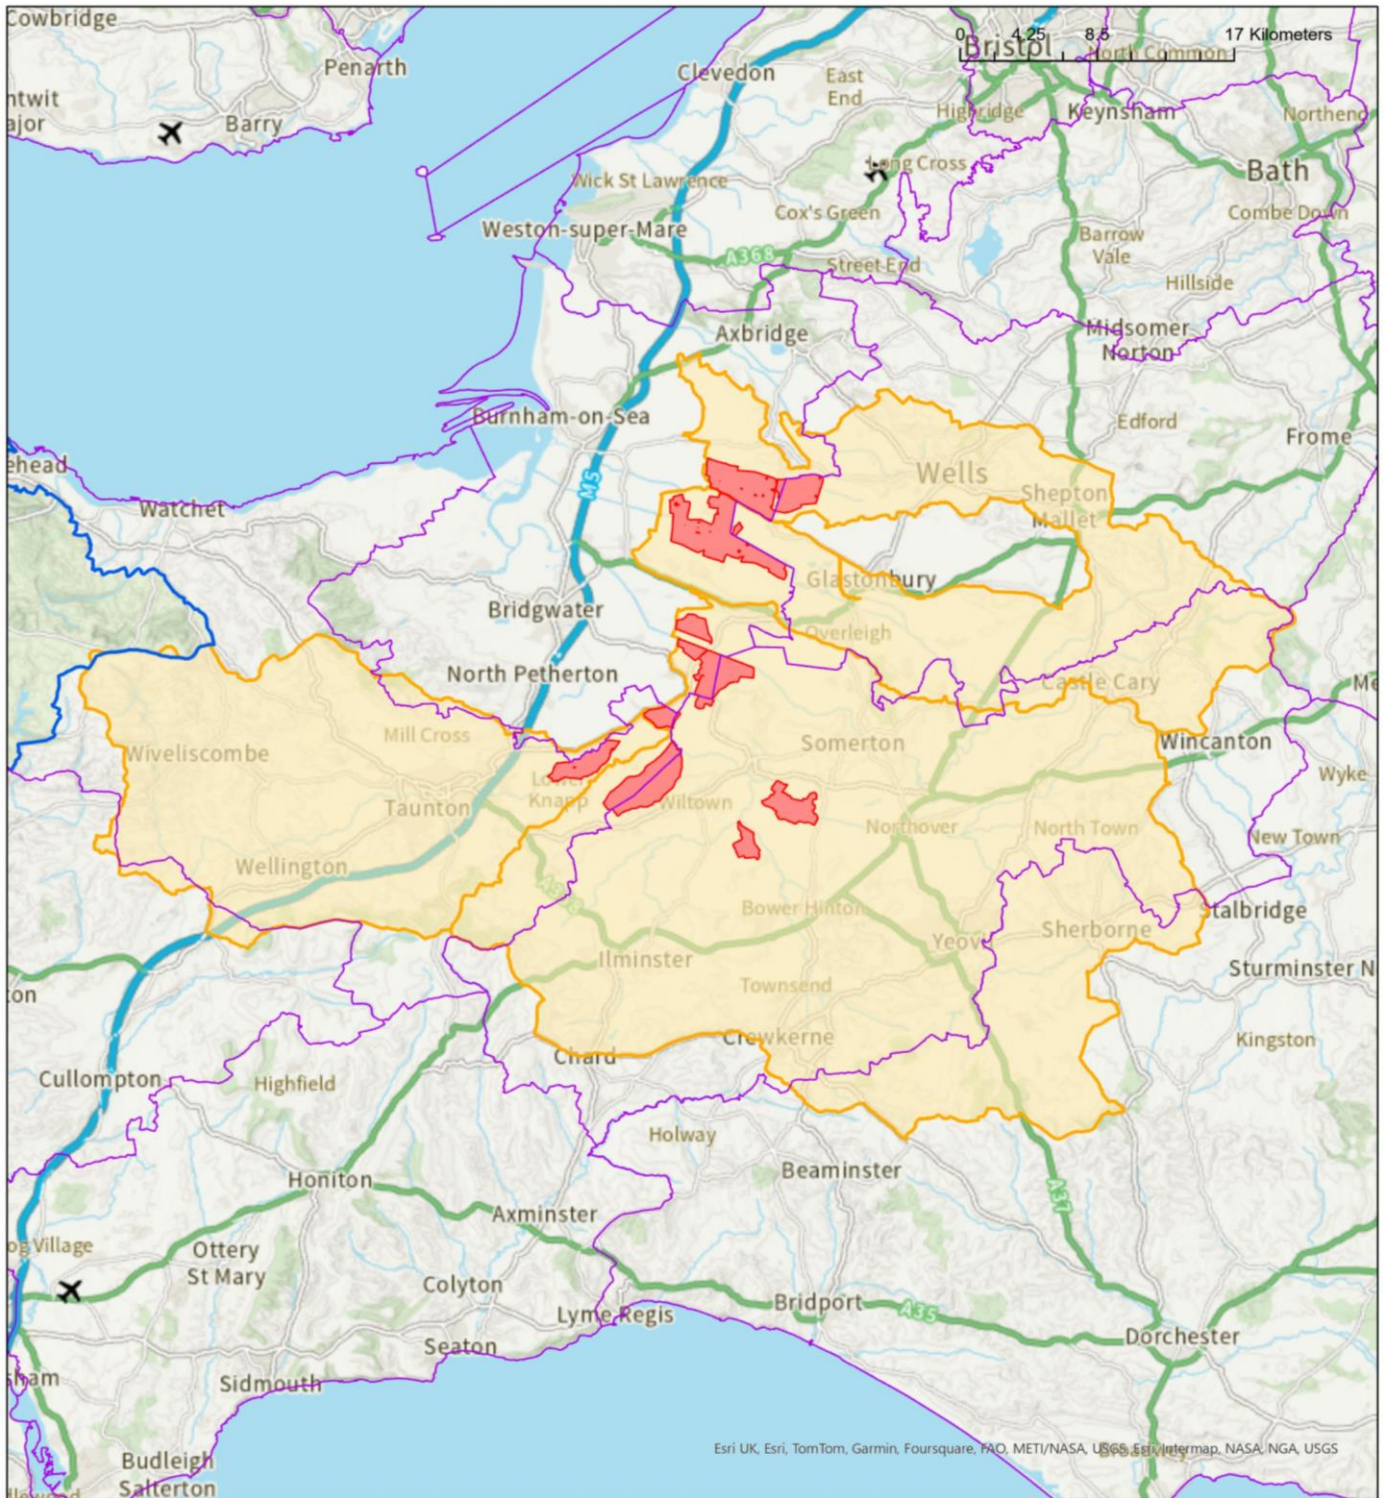

Catchment Area Update (2024)

Natural England has undertaken a review of all the Nutrient Neutrality catchment areas. This review has considered updated surface water catchment data and evidence held by both Natural England and the Environment Agency. Consideration has also been given to data and evidence provided by parties such as Local Planning Authorities. The information below summarises changes.

The update has removed a number of areas from the catchment, this change is in response to data provided by Somerset Council. The catchment is now consistent with the data published on Somerset Council's website.

Publishing of catchment area data

The Geographic Information Systems (GIS) data is available on [Defra Data Services Platform](#).

Area where Natural England’s Nutrient Neutrality advice applies for Somerset Levels & Moors Ramsar

European protected sites requiring nutrient neutrality strategic solutions

- ▭ Local Authorities
- ▭ National Parks
- ▭ Component SSSIs of impacted designated site
- ▭ Surface water catchment area of relevant designated site due to nutrient pollution

Glossary

Ramsar – A Ramsar site is a wetland site designated to be of international importance under the Ramsar Convention, also known as the ‘The Convention on Wetlands’, an intergovernmental environmental treaty established in 1971 by UNESCO

SSSI – Site of Special Scientific Interest

Natural England is here to secure a healthy natural environment for people to enjoy, where wildlife is protected and England's traditional landscapes are safeguarded for future generations.
