

SITE: ASTON MILLS

1. **Location:** to the south east of Kemerton
2. **Grid Reference:** SO856380.
3. **Date of Survey:** 3rd of September 1992.
4. **Geology:** Mercia Mudstone and River terrace deposits
(sheet 216. Tewkesbury. 1:50000).
5. **Climatic Limitations:** None.
6. **Site Limitations:** None.
7. **Agricultural Land Use:** Sugar beet.
8. **Agricultural Land Quality:**

Grade 2: The soil typically has a medium clay loam or sandy clay loam overlying clay.

Calcium carbonate concretions are found throughout the profile. The main limitation to the agricultural use of the land is droughtiness.

Grade 3a: The soil typically has a medium clay loam or sandy clay loam texture overlying sandy clay loam or medium clay loam at depth. Calcium carbonate concretions are found throughout the profile. The main limitation to the agricultural use of the land is droughtiness.

Grade 3b: The soil typically has sandy clay loam texture overlying medium or heavy clay loam. The soils are fairly shallow typically about 55cm in depth. Calcium carbonate concretions were found throughout the profile. The main limitation to the agricultural use of the land is droughtiness.
